

# DPP-250PA/350PA

## Blister Packing Machine for Ampoule

### Applications:

DPP-250PA/350PA Blister Packing Machine is widely used for syringe, vials, injection, ampoule blister packing.

### Feature:

1. DPP-250P/350P Blister Packing Machine follows the GMP structure standard, and adopts PLC touch screen interface control system.
2. All components that contact with pharmaceutical products are made of high anti-corrosive SUS 316 stainless steel.
3. The main motors are equipped with a variable frequency speed controller.
4. Our packing machine are equipped with servo filling system and blister forming detection device.

Technical Parameters	DPP-250PA	DPP-350PA
Maximum Working Capacity	100 blister/min	150 blisters/min
Stroke	Less than 130mm(according to customer's request)	Less than 130mm(according to customer's request)
Max. Forming Area	245*130*35mm	345*130*35mm
Packaging Material	PVC:260*0.25(0.15-0.5)mm PTP:260*0.2mm	PVC:350*0.25(0.15-0.5)mm PTP:3500*0.02mm
Power Supply	380v 50Hz(220v 60Hz)	380v 50Hz(220v 60Hz)
Total Power	6kw	7kw
Dimension of machine(L*W*H)	4500*850*1700mm	4500*850*1700mm
Weight	2000kg	2500kg
