

Hammer Mill

GJ Series

Hammer Mill

This **GJ** Hammer Mill is applied by the industries of pharmaceuticals , chemical, metallurgy, foodstuff, and architecture. It specially grinds the hard and solid granule materials including the breaking of plastics materials and copper wires, well as the pretreatment coordinated machine for fine grinding process.

Work Principle:

This machine use fixed tray and relative motion between the active hammer piece, causes the material to attack in machine the cavity but fast obtains the smashing. After the smashing material after revolves the centrifugal force function, automatically enters traps the bag, the dust filters the recycling by the dustbin after the cloth sack.

Technical Data	GJ-250	GJ-350	GJ-450	GJ-650
Capacity	30-150	50-300	100-600	200-1000
Size of input granules(mm)	<5	<5	<5	<5
Crushing fineness(mesh)	20-120	20-120	20-120	20-120
Main Motor (KW)	4/5.5	7.5/11	11/15	22/30
Overall Size L×W×H	1200×700×2000	1300×800×2100	1400×900×2300	1600×1100×2500
Power supply	220v/380v;50-60hz	220v/380v;50-60hz	220v/380v;50-60hz	220v/380v;50-60hz
Machine weight	300	600	900	1200
