

Hot Air Circulation Oven

GMP Series

Hot Air Circulation Oven

The **GMP** hot air circulation ovens are widely used in pharmaceutical, nutraceutical, herbal, chemical and other similar industries.

Features:

- Heating source: provided vapor, electricity, infrared heat as well as electricity and vapor dual type.
- Temperature heating by vapor: 50-240 C
- Temperature by infrared heat: 50-350 C
- Auto control system and computer control system are optional.
- Usual vapor pressure: 0.1-0.6 MPA.
- The electric heating, calculate according to "I" model is 15kw. Practical consumption 5-8 kW/h.
- All new improved series with high quality stainless steel construction to meet the current GMP Standard.

Description:

GMP Pharma Ovens are designed with even flow hot air circulate throughout the trays utilized the vapor or the electricity (infrared heat) as heat sources or steam heating using boiler. The axial flow blower exchange the heat to the heat exchanger by this means heating the air. The hot air layer through the trays proceed materials. The fresh air enters the oven from air inlet to proceed supplement, then exhausts out the hole for draining the moisture. It continuously supplies the fresh air and exhausts the wet hot air, thus to maintain the appropriate relative humidity in the oven. The main feature of these ovens is that hot air is recycled in the inside of oven, so that to enhance the heat conduction and to save the energy resources.

It utilizes the function of enforce ventilation, to reduce the temperature difference between the top and bottom. The user can proceed temperature adjustments prior to operating so it can make the temperature difference between the top and bottom at the optimal state.

Dimensions:

Technical Parameters						
Model	Capacity (Kg)	Power (kw)	Total Drying Area (m ²)	Trays	Dimension W×D×H(mm)	Carts
GMP-0	30	0.45	5	16	1480×1100×1750	1
GMP-I	120	0.45	20	48	2300×1200×2000	2
GMP-II	240	0.9	40	96	2300×2200×2000	4
GMP-III	360	1.35	80	144	3430×2200×2000	6
GMP-IV	480	1.8	100	192	4460×2200×2290	8

SaintyCo also offer:

Encapsulation Solutions

Tablet Compression Solutions

Coating Systems

Cartoning Systems

Blister Packing Solutions
