BM4.0

Laboratory Blistering Machine

-Compact, Seamless, and Efficient

BM4.0 known for its compactness and user-friendly interface, empowers your company to internalize the packaging phase. Tasks that were once delegated to external suppliers can now be seamlessly managed in-house, eliminating the requirement for special equipment or specialized personnel. This transition results in a significant reduction in costs, minimizes delays, and optimizes the timing of product launches in the market. With BM4.0, take control of your packaging process and streamline your operations for enhanced efficiency.

Blister Packaging Made Accessible for All:

Discover the accessibility of blister packaging with **BM4.0** quick, easy, and suitable for everyone. Installing and using **BM4.0** is a breeze, requiring no specialized training or the presence of a dedicated technician. Now, anyone can effortlessly utilize this innovative solution, making blister packaging accessible to all without compromising on efficiency. Simplify your packaging process with BM4.0 where user-friendliness meets professional performance.

Effortlessly Efficient: (Semi) Automatic Blister Production

Experience the seamless functionality of **BM4.0**'s (semi) automatic feature. With three stations operating simultaneously, operators can effortlessly produce blisters with each insertion of molds. This synchronized process mirrors the efficiency of a fully automatic production line. **BM4.0** takes blister production to the next level, combining the precision of automation with the flexibility of manual control. Elevate your production capabilities with the perfect blend of innovation and user-friendly operation.

Portable Excellence: Compact Design for Any Workspace

Immerse yourself in the versatility of **BM4.0** with its compact and portable design. The Desk Design configuration enables convenient storage on any laboratory bench, providing easy access for immediate use. But that's not all – the ergonomic design is further enhanced with soft-touch buttons, ensuring a comfortable and intuitive user experience. Compact and straightforward, **BM4.0** is designed to be accessible to anyone, making it the ideal solution for streamlined and user-friendly operations in any setting.

Technical Data	BM4.0
Blister type	Pvc-Alu / Alu-Alu
Forming thickness	14 mm / 10 mm
Blister width	110 mm / 110 mm
Blister length	120 mm / 120 mm
Electrical supply	220 V / 50 Hz 2.6Kw
Air supply	0.2m3/min 0.4-0.6Mpa
Format change	4 min
Dimension	635×575×710mm
Weight	115kg

SaintyCo Also Offer:

- Capsule Filling Machine
- SoftGel Systems
- Coating Systems
- Cartoning Systems
- Blister Packing Solutions
